- 22 Event Profile
- 26 Para Events Economic Impact Summary
- 30 Key Learnings

Adapted Sport: Economic Impact Study

Create an understanding of this economic data within the adapted sport movement:

- To collectively, as a movement, build an economic business case of the industry that moves beyond subjective narratives.
- To give individual organizations and leadership a resource as they share this perspective on the movement's economic power.

Adapted Sport: Economic Impact Study CONTEXT & METHOD

All in Sport Consulting, in partnership with Stitch Marketing Research and Huddle Up Group, conducted a benchmark study of expenditures and budgets of adapted sport organizations across the U.S. This same study was first done in 2020.

- Surveys were emailed to 243 contacts representing 192 organizations.
- + Fieldwork was conducted between August 24 October 10, 2022.
- **34 organizations'** economic profiles are represented in the following report, including partial and complete survey responses.
 (24 completes, 10 partials)
- + This year, we also conducted one-on-one interviews with industry leaders.

Adapted Sport: Economic Impact Study CHALLENGES

This year, we ran into challenges collecting the survey data.

Because of this, we've included a review of our goals in conducting the study and shared more about the reasons we believe that creating understanding around the economic impact of adapted sports events is important to our industry.

How do we interpret this data?

The benchmark study is an ongoing project that provides a benchmark of the economic impact of the adapted sport movement in the U.S. The first study was done in 2020, reflecting activity from 2019.

- While the data collected is not comprehensive of all organizations, it sheds light on directional trends of the adapted sport industry and is a sampling.
- + This data is **representative of the participating organizations** and is not an exact projection of the total market.
- Partial survey responses have been included in this report to maximize insights. Data findings are annotated with respective respondent sample sizes. You'll note sample size denoted as (n = xx) throughout the presentation.

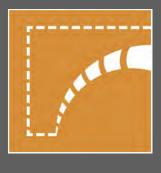

Economic Impact

Educating ourselves & others

Creating a financially-focused resource

By understanding our industry's economic impact, specifically events, we can accomplish more for our athletes and the overall movement.

Educate ourselves

"The more a numbers case can be made, the better. It makes the conversation with communities much easier because it's what they (destinations) look at first. Economic impact is a major driver for them."

> -Jason Gewirtz, Executive Editor/Publisher, SportsTravel (paraphrased quote)

Key Insight: If numbers are important to host cities, our organizations need to understand them, too.

Regarding host cities & destinations:

"There is a lack of understanding and knowledge about what's needed to organize events like these. Training and education are where you start, and it takes time to do that."

Key Insight: Our sports organizations must take the lead on educating the destinations we are asking to host events.

Educate cities, sponsors, & boards

-Amy Rauworth, Chief of Development and Strategic Partnerships, Lakeshore Foundation (paraphrased quote)

Create a better infrastructure for athletes

"The biggest benefit adapted sport events provide are that they help create an infrastructure for future events: it's not just the events themselves, but what continues to happen after the event has taken place."

> -Stephane Leblois, Director of Partnerships, The Valuable 500 (paraphrased quote)

Key Insight: Creating and growing disability awareness benefits the entire community. Community-wide impacts last much longer than the events themselves ie, social change and sport

Educate ourselves

First, we need to educate ourselves on the economic impact of our events with host communities, large and small.

Lead Conversations

"Sports organizations are the lynchpin to making this all happen. Nothing would happen without them."

> -Jason Gewirtz, Executive Editor/Publisher, SportsTravel (paraphrased quote)

Elevate Conversations

"We have to be able to elevate the conversation within our organizations in order to broaden discussions with host locations."

> -Dawna Callahan, CEO, All in Sport (paraphrased quote)

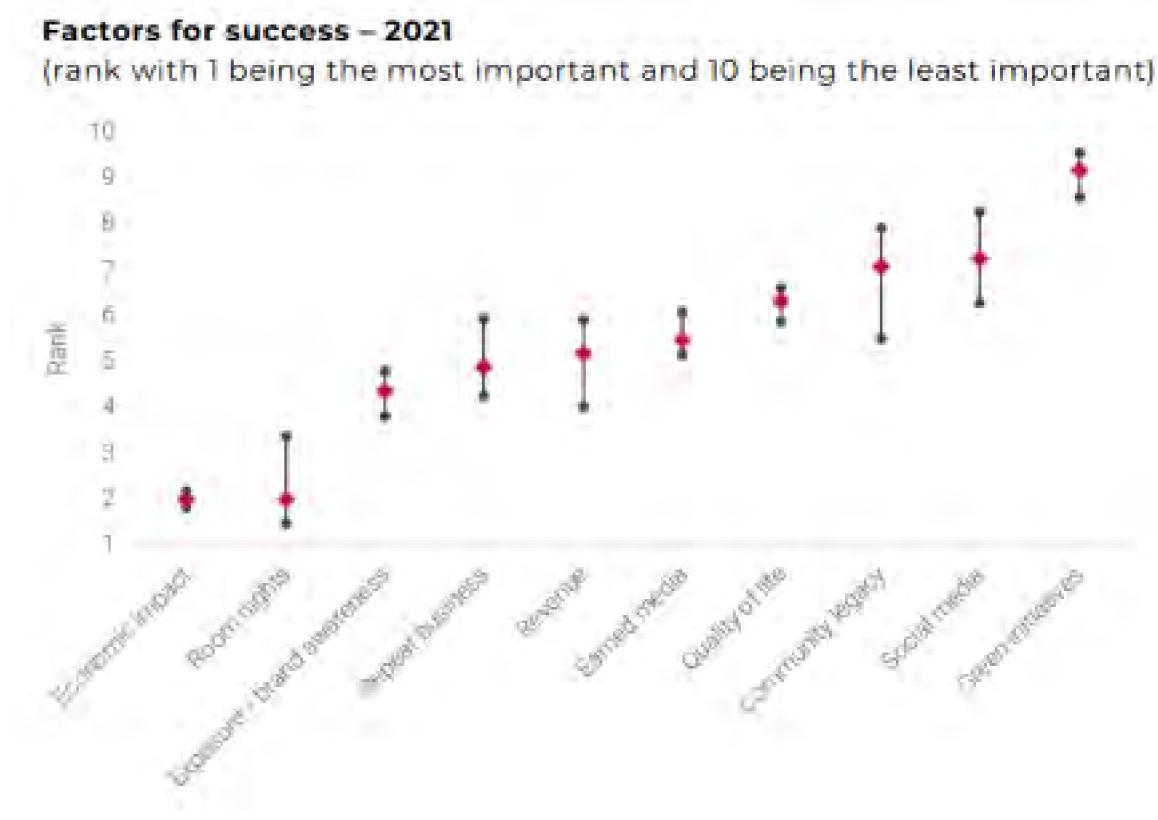

What's important to host destinations: Economic Impact

In Sports ETA's 2021 survey, they asked 176 destination members to rank 10 success factors:

- Destinations ranked **Economic impact** and **Room nights** as the <u>two most important</u> factors for success in 2021.
- Ranked in the <u>middle</u> were Exposure/brand awareness, Repeat business, Revenue, and Earned media.
- Quality of life, Community legacy, Social media, and Green initiatives were <u>ranked</u> as less important factors for success.

Educate cities, sponsors, boards and sport leaders

When we understand the economic impact, it's valuable information that can be used to educate others about what our events bring to communities – beyond subjective narratives.

"Adapted Sports organizations have the power to showcase their events and their athletes if they can help cities understand that these are events that they are capable of hosting."

> -Jason Gewirtz, Executive Editor/Publisher, SportsTravel (paraphrased quote)

One of the stated goals of Sports ETA's State of the Industry report is to "provide an essential tool for **advocacy** of that work to all categories of industry stakeholders."

> -Quoted from the Sports Events & Tourism Association State of the Industry Report 2021

Create a better infrastructure for athletes

In turn, this resource will help us build a better infrastructure for our athletes.

"Sports translates to opportunities beyond the playing field. It provides opportunities for people with disabilities to remove intrinsic barriers, it fosters leadership skills, and it translates to other areas of life in general."

"Physical activity provides opportunities for growth and development and expands what you believe you can achieve in life: to interact with other people through sport is important."

"These events empower people, they come see rugby players plowing into each other - it does change their perspective!"

> -Amy Rauworth, Chief of Development and Strategic Partnerships, Lakeshore Foundation (paraphrased quotes)

"The biggest benefit the sporting events provide are that they help create an infrastructure for future events: it's not just the events themselves, but what continues to happen after the event has taken place.

Everyone thought it was silly that the US was hosting the 1994 FIFA Cup, but that event changed the course of soccer in the US."

> -Stephane Leblois, Director of Partnerships, The Valuable 500 (paraphrased quote)

The movement has momentum

Organizations like these are leading the movement nationally and internationally. We have an opportunity to use their momentum.

"To provide opportunity for individuals with disability to live a healthy lifestyle through physical activity, research, advocacy and health promotion."

"The Paralympic Movement has adopted and follows athlete-focused values, which act as the underlying reference for all those involved in Para sport."

"500 CEOs and their companies have joined by making a commitment to action for disability inclusion. They are now beginning to work together as a collective, to drive system change."

"The Paralympic Movement is growing in this country, and we can use sport as a vehicle to change a lot of perceptions and lives."

-LA Creator Paralympian Scout Bassett*

Respondent Profile

Organization type

Organizational role

Role in the Organization

Respondent roles varied more in 2022, relying more heavily on Program Managers and Program Directors.

Adapted Sport Organization Revenue 2022

Which of the following categories includes your organization's revenue for calendar year 2021 (or fiscal equivalent)?		
	50%	48
Nearly 50% of organizations in this survey operate at under \$250K in annual	40%	
revenue.	30%	
Two-thirds (67%) operate at less than \$1M in annual revenue.	20%	
	10%	
One-third (31%) operate at more than \$1M in annual revenue.	0%	SOT
The intention in reporting these figures is that they may lead to additional sponsor	Unde	1,5250H
support by shifting the narrative and providing objective financial impact with partners.	[n=3	81]

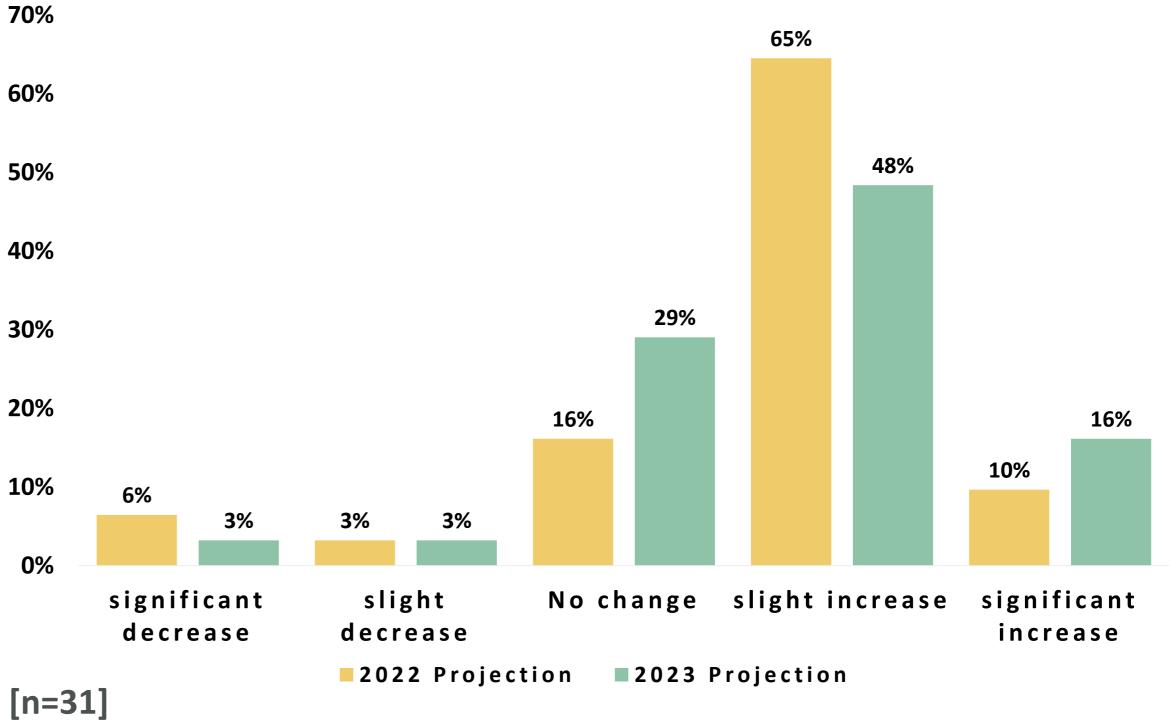

Revenue Projections in 2022 and 2023

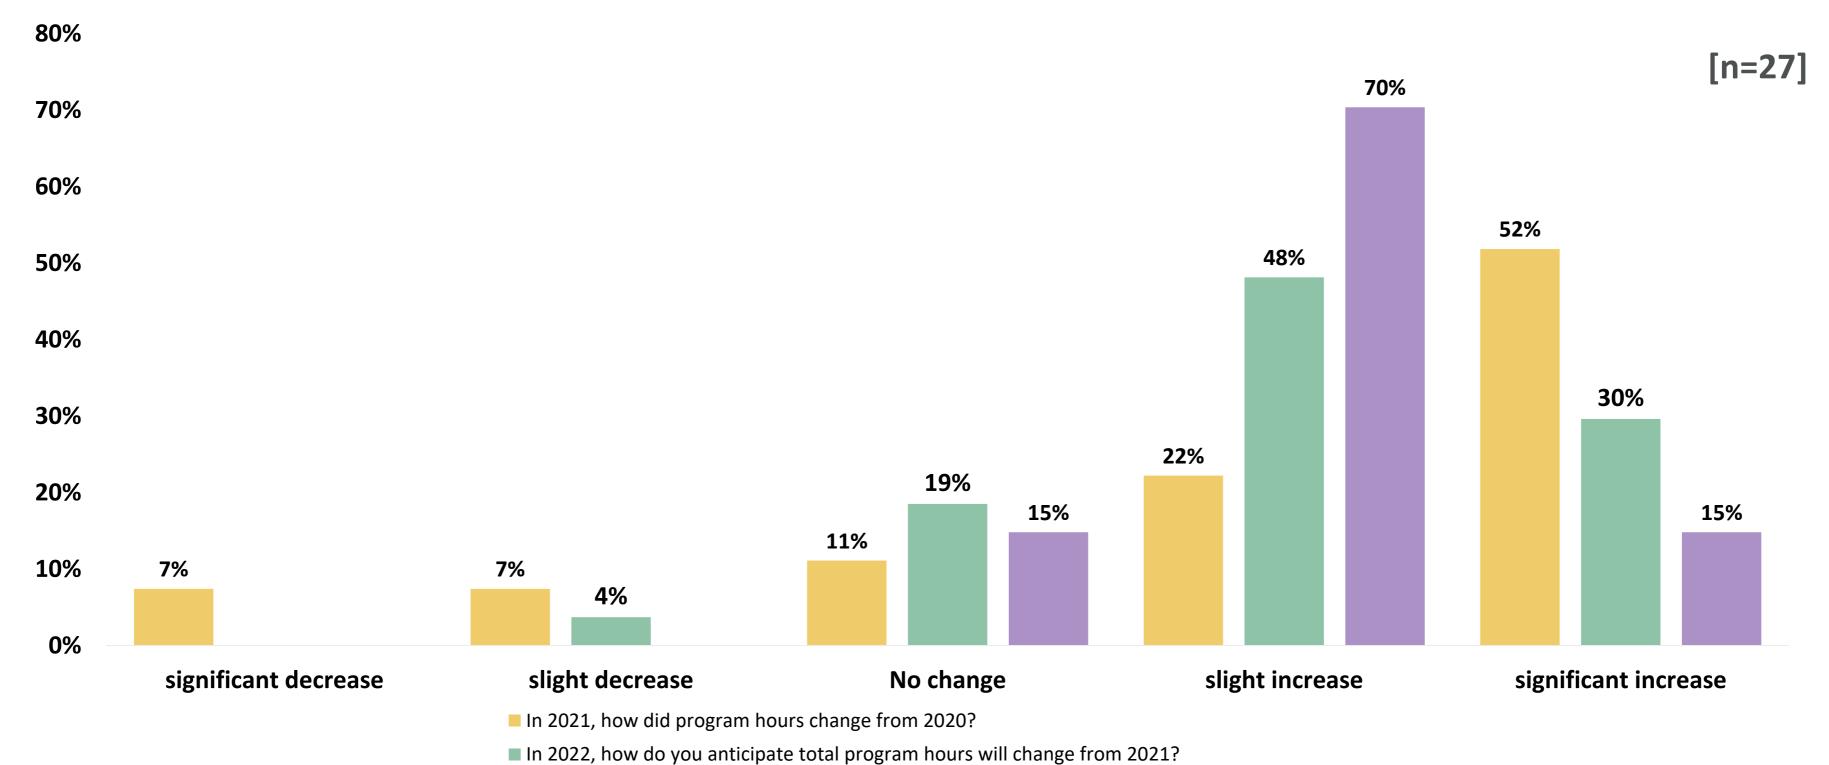

With fieldwork conducted more than	70%
halfway through 2022, leadership	60%
anticipates the year's revenue to be increased over 2021.	50%
	40%
Forecasts for 2023 are also optimistic, with respondents predicting slight to significant	30%
increases in revenue in the upcoming year.	20%
Organizations appear to be recovering	10%
from COVID shutdowns.	0%

In 2022/Looking ahead to 2023, what do you anticipate will be the change in revenue results versus 2021/2022 (total contributions, program revenue, etc.)...?

Program Hour Projections 2022 and 2023

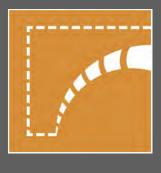

Similar to revenue trends, leadership predicts increased hours for the 2022 year, and forecasts mostly slight increases in 2023.

Looking forward to 2023, how do you anticipate total program hours will change from 2022?

Event Profile

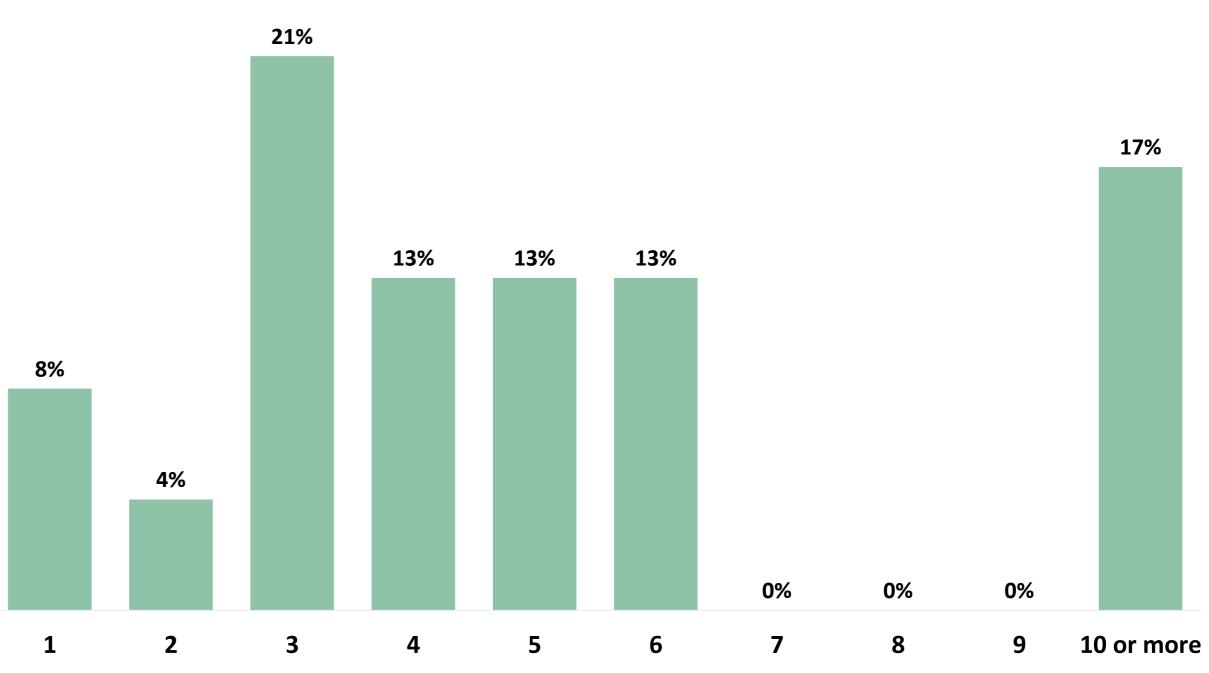

Event profile – number, length, type Participants, spectators, athletes Staff, volunteers

Number of Events

25% 20% Organizations that hold either one event or 10 or more represent half of all represented 15% respondents – again, showing 13% the polarity of the industry. 10% Survey respondents were capped at 5% reporting on 10 events, so this calculation is conservative. 0%

Total Estimated Events: 104

Total estimated events calculated with organizations reported average number of events.

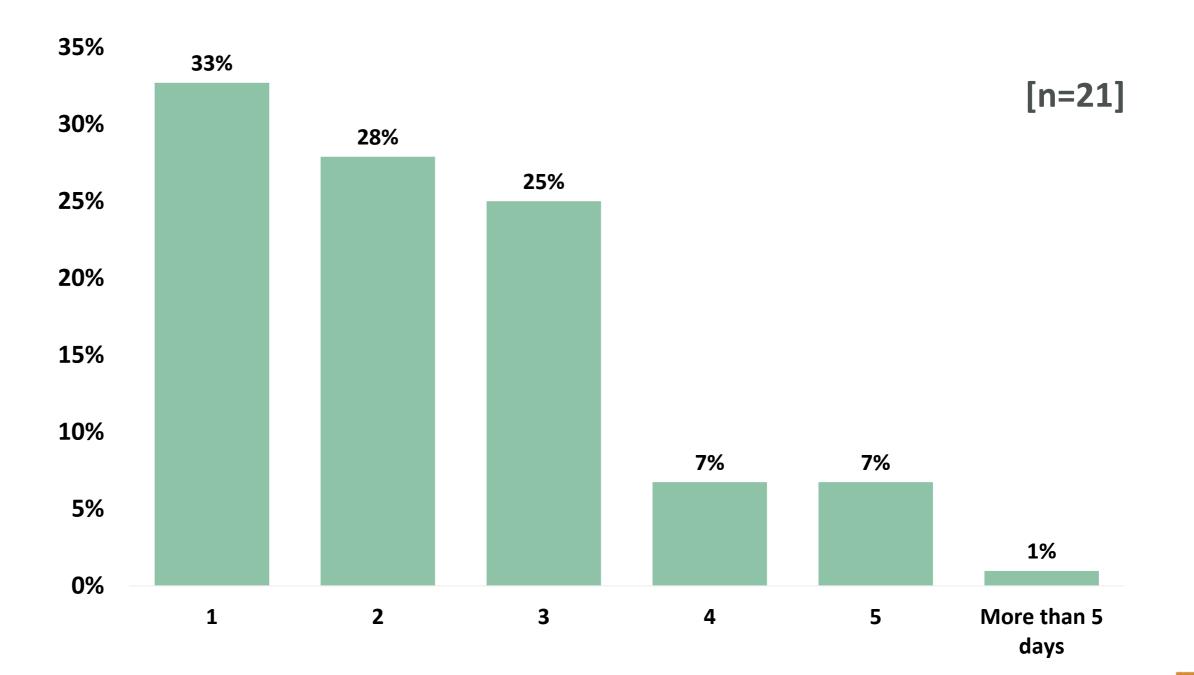

[n=24]

Events – Length

Total Estimated Days of Events: 239

The overwhelming majority of events, 86%, lasted 3 days or fewer.

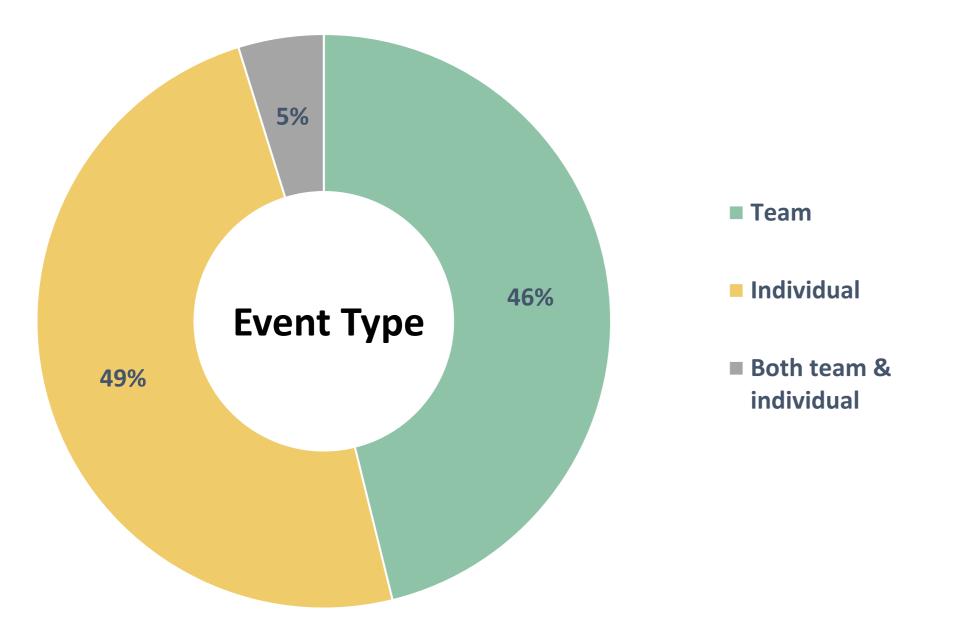

Total estimated days are calculated using organization events and length of time. This is a conservative number, as respondents were capped at reporting "more than 5 days".

Events – Participants

Total participants are calculated based on organization responses. Estimates based on athletes per team are included, with additional participants as listed above from 21 organizations.

Total Estimated Event Participants: 32,133 participants

Event Participants	
Athletes, Coaches	11,130
Event administrators (e.g., referees/officials, event workers, volunteers)	4,616
Spectators	16,387
Total Participants	32,133

Para Events Economic Impact

Para Events Economic Impact - 2022

Para Events Economic Impact: \$6,782,592*

* Only 12% of the Adapted Sport community completed the survey and the total Economic Impact of their events (n=104 total events) is noted above.

Economic Impact is calculated using 2021 El survey data from Sports & Events Tourism Association or SportsETA.

The above estimate is a conservative representation of economic impact within the industry organizations that completed this survey were able to report on a maximum of 10 events, with a cap of "5 or more" days per event.

Note: Total EI based on a summary of one day events and multi-day events, with calculations taking into account events that would not include hotel room stay and those that would include higher spend on room nights and travel.

Para Events Total Economic Impact – 2022

Para Events Total Economic Impact: \$77,751,674

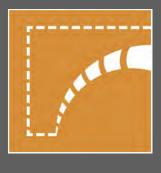

Calculations and total economic impact estimates were made for the adapted sport community based on the completed surveys.

The figure above is a conservative estimate, yet still sheds light on the economic power of the national adapted sport industry.

It's critical to continue this important work to build understanding that adapted sport is more than subjective narratives. Educating and increasing awareness around the economic strength of the movement is key.

Key Learnings

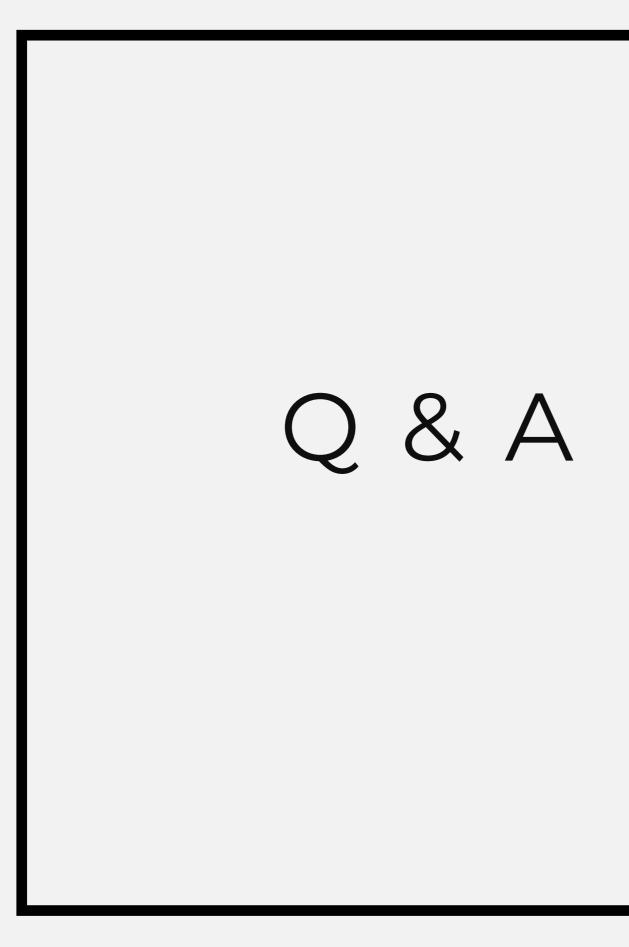

Market Landscape Report Key Learnings

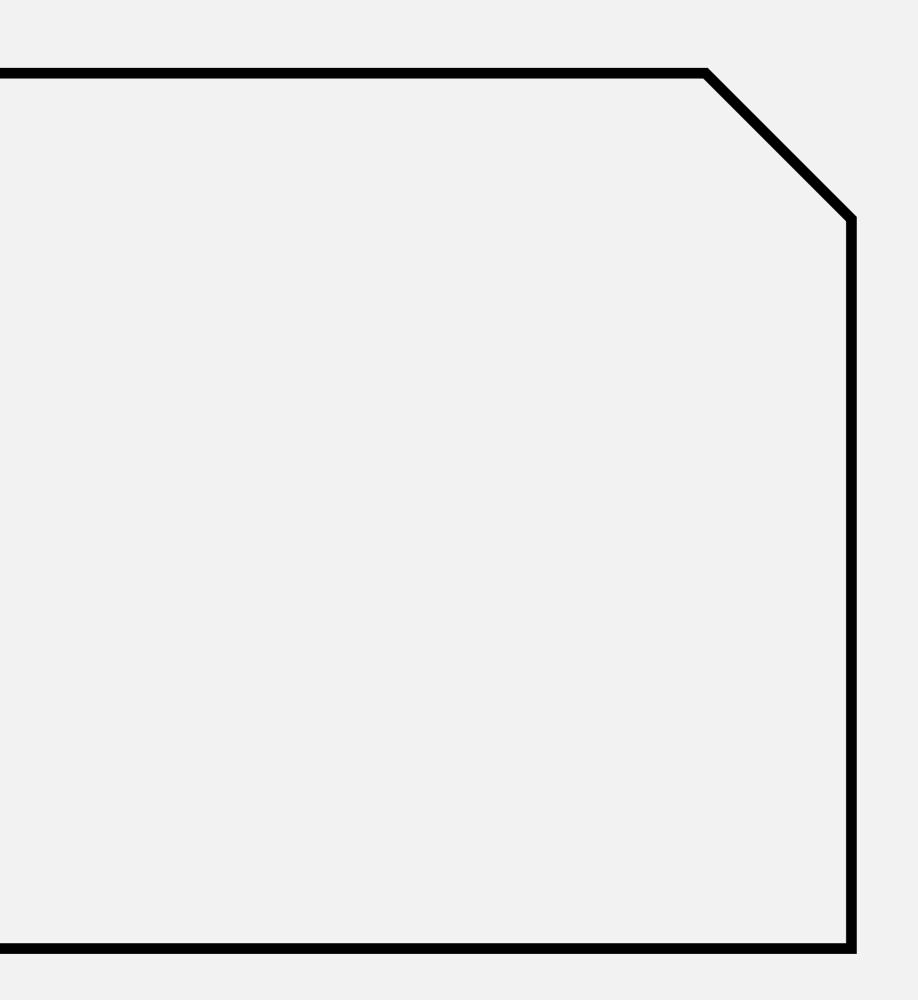

We have to take the lead in educating ourselves on the topics that are important to host destinations and our industry's role in Economic Impact.

With this information we can better educate host destinations about what our events bring to the table, shifting the conversation to focus on the movement's economic impact.

The overall goal being to create a better infrastructure for our athletes in the long run and increase disability awareness through sport.
